

TB-0350

**REMOVAL OF THE XEROX 4850
HIGHLIGHT COLOR PRINTER**

Issue Date: September 30, 2004
Effective Date: September 30, 2004
Section/Group: ITS Operations/Print Services
Submitted by: Lisa May
Approved by: Jim Calaway

As of October 15, 2004 ITS will no longer offer Xerox 4850 Highlight Color print services. The cost of operating the Xerox 4850 has become prohibitive due to the high volume of previous Xerox 4850 customers who have moved to the black and white Xerox 135 printers.

ITS operates two network and mainframe connected Xerox 135 printers, each capable of producing 135 pages per minute (as opposed to the 50 pages per minute on the Xerox 4850 printer). Bolding and/or shading can replace what was previously highlighted with color. The Xerox 135 printers operate 24 hours per day, 365 days per year.

To establish a print account for the Xerox 135 printer, access the ITS Web site at:

<http://its.utah.gov/productsservices/printing/printing.htm>

Select and complete the **Request Print Services Order Form**.

If you have questions or concerns, please call the ITS Customer Service Center at 538-3440.
